

Why Accuro?

You work hard every day to provide the highest quality patient care. Putting all the pieces together is a challenge but there is technology available to help you.

Accuro was designed to satisfy the need for a complete clinic management solution. Every function of Accuro is integrated with all the other functions, which makes the software so much more than the sum of its features.

Too often clinic software is made one size fits all but Optimed recognizes that every clinic is different. Accuro supports these differences by being configurable to your clinic's unique workflow: all forms, letters, and templates are fully customizable.

At Optimed, we have an Advisory Board of practicing physicians helping us to continually improve our software to ensure our integrated system continues to meet all your clinic's needs. We are dedicated to providing our clients with the best customer service and support.

We know you are taking care of your patients. Let Accuro take care of your clinic management!

I want Accuro. What is the next step?
