

NEWS RELEASE

P & P DATA SYSTEMS GAIN CMS 2.0 CERTIFICATION FOR NUMEROUS PRODUCTS FROM ONTARIOMD

Certification is a Significant Step Forward for P & P Data Systems

TORONTO, CANADA – March 12, 2008 – P & P Data Systems (www.p-pdata.com), a leading developer of paperless solutions for the medical industry, today announced OntarioMD Inc, has granted CMS Specification 2.0 certification for its: CIS (Clinic Information System) Practice Edition 7.4.5; CIS Enterprise Edition 7.4.5 and its CIS Clinic Edition 7.4.5.

P & P's Clinic Information System, is one of the medical industry's most advanced software solutions specifically designed to automate patient records and completely eliminate paper-flow. CIS is a powerful enterprise-grade engine that drives the process of managing patient care. It frees its users to focus on patient care and having immediate, paperless access to mission-critical information. In so doing it enhances best business practices in the medical community.

A Clinical Management System (CMS) is a software application that combines the clinical and administrative aspects of practice management into an integrated electronic record.

“We are absolutely thrilled to have received this important certification,” said Moshe Pinhas, President, P & P Data Systems. “Our products were really put through their paces in satisfying OntarioMD's criteria for certification. The certification process was vigorous, applied fairly and practical. That we are one of the first vendors to complete the certification process is proof positive of our commitment to enable our clients to advance and to take advantage of funding opportunities.”

Specifications for CMS solutions have been developed through the Physician IT Program to ensure the solutions adopted by physicians meet or exceed specific baseline functionality. All CMS offerings seeking to be funding eligible under the Physician IT Program have to be reviewed and certified by OntarioMD to confirm they meet the baseline functionality. Eligible physicians who purchase CMS certified solutions may receive funding under the Physician IT Program to assist in the purchase and use of the offering.

“We are pleased to announce the certification of CIS (Clinic Information System) Practice Edition 7.4.5; CIS Enterprise Edition 7.4.5 and CIS Clinic Edition 7.4.5 to the CMS Specification 2.0. P & P Data Systems Inc. worked hard to incorporate the new

requirements into their Offering and to pass the certification process,” said Brian Forster, Chief Executive Officer, OntarioMD Inc.
