## ADVANTAGES

**JonokeMed™ is all your clinic needs.**

### THE COMPLETE JONOKEMED™ SOLUTION

**Feature-rich**, integrating with your practice to provide everything needed in a computerized clinical environment.

**Designed for the future** with massive storage capability, simple expansion without compromising speed or security, and ongoing enhancements to keep your JonokeMed™ system current.

**Ease the learning curve** with included startup training, and available 'refresher' training as you need it. Plus, join us each year for the Annual National Conference for workshops and group instruction.

## JonokeMed™ Leading the EMR Evolution

Put side-by-side with other Electronic Medical Record software programs, Jonoke Software's all-encompassing solution, JonokeMed™ out performs the alternatives.

JonokeMed™ has...

### **The MOST features**

Scheduling, encounters, medical records, chronic problem management, prescriptions, reference libraries and clinical assistants, accounting, health service provider electronic billings, word processing, archiving, reporting, forms, inventory, paperless faxing, full security... the list is overwhelming.

### **The ULTIMATE in support**

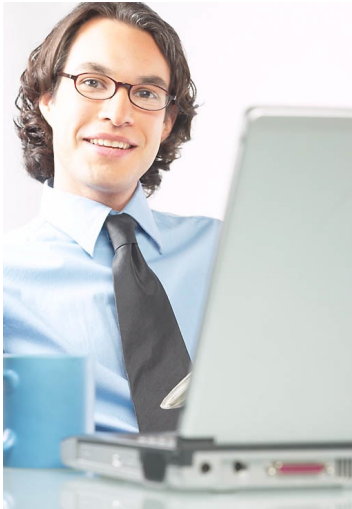

Emergency pager response, thorough phone support, e-mail and fax support, free bug fixes, many free enhancements, online knowledge base, support issue tracking via the web, prompt problem resolution, hardware and software consultation and troubleshooting... this is the kind of help you deserve to be able to rely on.

### **The most COMPREHENSIVE training**

Group training in the first week, ongoing training and 'refresher' courses, annual conferences, user guides, online training videos... we want you to know how to use JonokeMed™ to its utmost.

JonokeMed™ represents everything you need to make your clinic paperless. It is being used every day in clinics across Canada. You, too, may decide JonokeMed™ is the best.

JonokeMed™ development has also relied heavily on user feedback, resulting in functionality and enhancements based on real-world use. What's more, JonokeMed™ will essentially always be in development, as its features are honed and augmented.

Jonoke's strong development team, working exclusively on our medical office software, set us apart from other vendors who have limited staff or whose EMR product is not the focus of their business. Our clients experience the benefits of having our undivided attention.

## Go EMR – and do it right the first time.

For a number of our current clients, JonokeMed™ “should have been [their] first choice.” There are many options out there for Electronic Medical Records, scheduling, accounting, and other software solutions. But clinics keep gravitating to Jonoke’s JonokeMed™ – even after trying to implement other EMR systems.

If you have yet to make the move to electronic records, or you are dissatisfied with your current system, you are sure to find what you need with JonokeMed™.

### A UNIQUE SOLUTION

JonokeMed™ is well beyond other EMR solutions, from the ground up. The decisions made during its more than 10 years of development have consistently focused on promoting its reliability and longevity for you, the user.

- **Stability.** The 4th Dimension (4D) programming language is a proven powerhouse for intensive, multifaceted data management. As a cross-platform solution, it provides the foundation for JonokeMed™ in a way that other EMR software simply lacks.
- **Security.** From outside or within your clinic, JonokeMed™ is a veritable fortress. Only the proper authorization will gain someone access to the system.
- **Scalability.** JonokeMed™ grows with your practice. The system you first purchase is not necessarily the last setup you will need. Adding workstations or expanding to multiple locations is always feasible, and without compromising performance.

### A DISTINCT COMPANY

Jonoke Software has been developing custom software solutions since 1988. We take pride in providing a complete, enduring software solution for modern clinics. We place a high priority on having skilled staff, for the sake of continuing the growth and strengthening of its flagship product: JonokeMed™.

We are currently comprised of:

- 16 dedicated software staff
- 5 dedicated support staff
- 5 software programmers
- technical writers
- 2 sales staff
- professional graphic designer

Our staff collectively has an extensive background covering many years of experience, with formal education in such fields as medical laboratory science, programming, electrical engineering, computer science, security management, economics, education, graphic communication, international business, and logistics management.
