

Nightingale continues to grow Ontario customer base, adding new clinics to its OntarioMD ASP certified EMR platform

Contract Wins Demonstrate that Nightingale is the Partner of Choice for Physicians Adopting EMR

Markham, ON – October 7, 2008 –Nightingale Informatix Corporation (“Nightingale” or the “Company”) (TSX-V: NGH), an application service provider (ASP) of electronic medical record (EMR) software and related services, today announced contract wins with two OntarioMD funded physician groups for its ASP EMR solution, highlighting the Company’s continued success in building on its Canadian market leadership position.

OntarioMD funded physicians at Perry Street Clinic and 1100 Family Health Network have selected Nightingale’s ASP EMR solution, Nightingale On Demand. Nightingale’s full featured web-based EMR and practice management offering relieves physicians from the burden of buying and implementing costly hardware and software and dealing with system maintenance and security issues.

“Nightingale’s ASP model is a significant leap forward in the delivery of EMR for physicians, as it provides me with secure anytime anywhere access to my clinic.” said Dr. William George of the Woodstock-based Perry Street Clinic. “We chose Nightingale On Demand because it is the most straightforward path for healthcare professionals to achieve the benefits of an EMR system, and will provide our clinic with a cost-effective, easy to implement solution to improve patient care and streamline administrative tasks.”

As a family practice and walk-in clinic, physicians at Perry Street provide care for more than 250 patients a week. As such, they required an EMR solution to improve management of their patients’ medical records and to more efficiently track regular patients and walk-ins. Particularly important to Perry Street’s five physicians is the secure on and off site access to patient charts and lab results that Nightingale’s ASP EMR solutions provides.

Toronto-based 1100 Family Health Network’s seven physicians will soon link to more than 30 physicians who comprise the North York Family Health Team – a group of family health physicians dedicated to improving patient care through the one patient, one record EMR model, making this one of the largest Family Health collaborations in Ontario. In the coming months, physicians at 1100 FHN will use Nightingale on Demand to connect to pharmacies, labs and specialists within the Family Health Team network, creating a complete continuum of care for their patients.

“Nightingale is proud to be able to work with forward-thinking physician groups that recognize the value EMR adds to the way they manage their practices and provide care to their patients,” said Sam Chebib, President and CEO, Nightingale. “These customer wins further demonstrate that Nightingale On Demand is the solution of choice for Canadian physicians who want to achieve the benefits of an EMR. As such, we remain excited in our efforts to work with doctors across the country as EMR adoption gains momentum.”

About Nightingale

Nightingale is one of the fastest growing health care service and software companies in North America with over 5.3 million patient records under management in a hosted (ASP) environment. It is recognized as an industry leader in Web-based clinician and community based electronic medical records (EMR) serving the needs of small primary care practices, multi-physician outpatient clinics, and large scale regional health organizations and networks. Coupled with integrated practice management, transcription and revenue cycle management, Nightingale's comprehensive service offering allows customers to enhance patient care, increase revenue opportunities and optimize operations. Nightingale is continuously innovating and enhancing its services to meet the needs of its growing and diverse customer base. Nightingale – Healthcare connected. www.nightingale.md

Forward Looking Statement

This press release contains "forward-looking statements" within the meaning of applicable Canadian securities legislation. Generally, forward-looking statements can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Nightingale to be materially different from those expressed or implied by such forward-looking statements, including but not limited to the speculative nature of the medical software industry, which is affected by numerous factors beyond Nightingale's control; the existence of present and possible future government regulation; the significant and increasing competition that exists in the medical software industry; the early stage of Nightingale's business; and therefore it is subject to the risks associated with early stage companies, including uncertainty of revenues, markets and profitability and the need to raise additional funding.

Although Nightingale has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those

anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. Nightingale does not undertake to update any forward-looking statements that are incorporated by reference herein, except in accordance with applicable securities laws.
