

Nightingale Launches Secure Web-based Patient Portal

Nightingale to target Priority Access at the more than 5.3 million patient records on Company's ASP EMR platform, providing Canadians with a direct link to their medical records and doctor

Markham, Ontario – September 17, 2008 – Nightingale Informatix Corporation (“Nightingale” or the “Company”) (TSX-V: NGH), an application service provider (ASP) of electronic medical record (EMR) software and related services, today announced the launch of Nightingale Priority Access, a web-based information and communication portal that can securely link patients across Canada with doctors who are using Nightingale’s ASP EMR solution.

“We believe Priority Access will facilitate better and more efficient healthcare across Canada,” said Sam Chebib, President and CEO of Nightingale. “Most Canadians interact with the healthcare system at the clinic level, but it can be very difficult to get face-to-face time with a doctor. Our web-based portal helps physicians and patients to communicate more conveniently and provides patients with tools that enable them to take an increasingly active role in their own healthcare.”

Priority Access is a highly secure web portal that provides patients with direct, online access to their physicians and their physicians’ office administrators. The innovative platform enables patients to schedule appointments as well as review and download their complete medical history, including prescriptions, allergy and medical assessments, via the Internet. Patients can also receive their lab results electronically, request prescription refills, consult with their physician online and access pertinent health-related educational material provided by their doctor. In addition, Priority Access can alert patients when they are due for a visit or a clinical procedure to help keep treatment plans on track, or as part of a normal health maintenance regime.

Unlike other personal health record products, Nightingale Priority Access is not populated and maintained by the patient. It is an aggregation of real clinical data that resides in the physician’s records for patients and their families.

“The launch of Priority Access is a key strategic step for Nightingale, as it extends our reach into the patient marketplace,” Mr. Chebib added. “There is growing demand from patients for direct access to their own health information. We are the only company in Canada with this complete of an offering, and we already have a sizable base of patient records under management on our ASP EMR platform. As such, we believe we are well positioned to become a leading provider of personal health record technology solutions.”

Priority Access is available through physician clinics that are using Nightingale’s ASP EMR technology. Physicians can offer all or various components of the service to their patients for a nominal fee, on a subscription basis. With Nightingale’s online portal, doctors can efficiently enhance the level of care they provide to their patients, while reducing operating costs and receiving additional direct compensation for services otherwise not covered by provincial health insurance plans. Prior to this broad public launch, Nightingale Priority Access was in use by several hundred Canadian patients over a period of 18 months.

About Nightingale

Nightingale is one of the fastest growing healthcare service and software companies in North America with over 5.3 million patient records under management in a hosted (ASP) environment. It is recognized as an industry leader in Web-based clinician and community based electronic medical records (EMR) serving the needs of small primary care practices, multi-physician outpatient clinics, and large scale regional health organizations and networks. Coupled with integrated practice management, transcription and revenue cycle management, Nightingale's comprehensive service offering allows customers to enhance patient care, increase revenue opportunities and optimize operations. Nightingale is continuously innovating and enhancing its services to meet the needs of its growing and diverse customer base. Nightingale – Healthcare connected. www.nightingale.md

This press release contains "forward-looking statements" within the meaning of applicable Canadian securities legislation. Generally, forward-looking statements can be identified by the use of forward-looking terminology such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved". Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of Nightingale to be materially different from those expressed or implied by such forward-looking statements, including but not limited to the speculative nature of the medical software industry, which is affected by numerous factors beyond Nightingale's control; the existence of present and possible future government regulation; the significant and increasing competition that exists in the medical software industry; the early stage of Nightingale's business; and therefore it is subject to the risks associated with early stage companies, including uncertainty of revenues, markets and profitability and the need to raise additional funding.

Although Nightingale has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements, there may be other factors that cause

results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. Nightingale does not undertake to update any forward-looking statements that are incorporated by reference herein, except in accordance with applicable securities laws.
