

UNCOMPLICATE YOUR PRACTICE

As a **Primary Care Physician**, you see everything. You manage a busy and dynamic practice and sit on the frontline of healthcare. You also face new challenges – from increasing numbers of chronic disease cases, to coping with escalating financial uncertainty, while working to effectively optimize your billing to match the patient care you provide. You need an EHR vendor you can rely on, so that you can focus on what really matters – your patients.

At Nightingale, we support our clients in family medicine with our progressive and easy-to-use cloud-based EHR, allowing you to manage the unique needs and workflow of your practice more effectively.

WITH NIGHTINGALE'S CLOUD-BASED EHR, YOU WILL HAVE:

Chronic Disease Management Tools

Proactively and effectively monitor and profile for chronic disease, such as diabetes, with your patients.

Customized templates for quick and effective documentation

Quickly and effectively document your high volume of unique patient encounters, from a simple cold to a smoking cessation follow-up visit.

Integrated drug database

Gain piece of mind that medication is being safely prescribed.

Lab interfaces with all major labs in Ontario

Order and receive test results for your patients in real time.

Simple billing

Capture maximum reimbursement with effective billing features and daily submissions.

The portability of the cloud

Access your records from the hospital, the clinic, or even at home. You are working harder – let the cloud help you work smarter.

At Nightingale, we've enjoyed over a decade of experience in EHR and support over 16,000 users on our system. We are the clear partner of choice when it comes to easy-to-use, intuitive and reliable web-based solutions for healthcare providers like you.
