

OB/GYN

MEET INCREASING DEMANDS

Today's **Obstetricians and Gynecologists** are facing a much higher demand for their service than ever before. Increasing physician shortages in this discipline mean more working hours, increased weekly outpatient visits, poor work/life balance and a highly irregular and demanding schedule.

You are working harder than ever, trying to do more with less, and find yourself wondering: "How do I sustain my heavy workflow and achieve work/life balance, while still providing the best care for my patients?"

At Nightingale, we support our OB/GYN clients with our intuitive and easy-to-use cloud-based EHR, allowing you to manage the unique operations of your practice more effectively.

WITH NIGHTINGALE'S CLOUD-BASED EHR, YOU WILL HAVE:

An automated and easy-to-use Antenatal form
Effortlessly document visits with an expectant mother.

Customized templates
Quickly and effectively document your patient encounters, from physical examinations to monitoring chronic gynecological conditions.

Personalized and easy-to-use consult letters

Integrated drug database
Gain piece of mind that medication is being safely prescribed.

Lab interfaces with all major labs in Ontario
Order and receive test results for your patients in real time.

The portability of the cloud
Access your records from the hospital, the clinic, or even at home. You are working harder - let the cloud help you work smarter.

At Nightingale, we've enjoyed over a decade of experience in EHR and support over 16,000 users on our system. We are the clear partner of choice when it comes to easy-to-use, intuitive and reliable web-based solutions for healthcare providers like you.
