

ORTHOPAEDICS

MANAGE COMPLEX BILLING

As the Canadian population grows and changes, an enormous demographic shift is occurring. The need for orthopaedic care is greater than ever before. **Orthopaedic Specialists** face the ongoing, daily challenges of managing an increased workload, coupled with new fee shortages, leaving them to bill considerably less for their services than they did 20 years ago.

You are working harder than ever to manage your growing roster of patients, your surgical responsibilities, and the complex billing process required to optimize your revenue.

At Nightingale, we support our clients in Orthopaedic medicine with our progressive and easy-to-use cloud-based EHR, allowing you to manage the unique operations of your practice more effectively.

WITH NIGHTINGALE'S CLOUD-BASED EHR, YOU WILL HAVE:

A robust billing system

Optimize your revenue with easy-to-use orthopaedic billing bundles, such as R687, R542, E494, E495 for ACL and meniscal reconstruction.

Electronic review of patient's imaging

Review a patient's x-ray results side-by-side with their current encounter notes.

Customized orthopaedic templates

Effectively document patient encounters with user-friendly customized templates for joint pain, consent forms for an ACL reconstruction, and more. You can also share and create new templates as you build them.

Personalized and easy-to-use consult letters

From Day 1, start with your "Favourites"

Pre-load Nightingale's EHR with your most commonly used progress notes, prescribed medications and ICD codes.

The portability of the cloud

Access your records from the hospital, the clinic, or even at home. You are working harder - let the cloud help you work smarter.

At Nightingale, we've enjoyed over a decade of experience in EHR and support over 16,000 users on our system. We are the clear partner of choice when it comes to easy-to-use, intuitive and reliable web-based solutions for healthcare providers like you.
