

## Patient Portal

Your Personal Health Manager

Clinisys EMR not only provides services for physicians and clinic administrators, but for patients too, with our Patient Portal, a secure, web-based software application extension through which clinics can allow patients the ability and independence to view and manage limited portions of their medical files, search for medical practitioners and clinics, and schedule appointments, among many other features.

See more about Clinisys' Patient Portal at our website, [www.clinisys.ca](http://www.clinisys.ca).
