

Clinisys EMR

Your Access to Clinical Intelligence™

Clinisys EMR is a web-based software application built for medical clinics to create, utilize, and manage patient electronic medical records (EMR) online on a secure and private platform. Clinisys EMR is built using state-of-the-art cloud-based technologies and provides convenient, flexible and secure access to physicians and clinic administrators to manage their practice and patients. Clinisys EMR supports a majority of browsers and operating systems and is suitable for touch-screen devices.
